Figure 1 displays 16 small plots arranged in a 4x4 grid. Each plot shows a different spatial pattern of points (dots) within a square boundary. The patterns vary in density and distribution, representing different realizations of a spatial process. The plots are labeled with numbers 1 through 16, corresponding to the rows and columns of the grid.

Figure 1 consists of two scatter plots. The left plot shows a positive correlation between the number of children and the number of adults, with a regression line indicating a positive slope. The right plot shows a negative correlation between the number of children and the number of adults, with a regression line indicating a negative slope.
